

SUPRIYA

Frontend Developer · Aspiring Full-Stack Engineer · Computer Science Engineering Student

Delhi, India | supriya0442006@gmail.com | +91 8700524544
[linkedin.com/in/supriya-29772736b](https://www.linkedin.com/in/supriya-29772736b) | github.com/Supriya0446 | [Portfolio](#)

Third-year Computer Science Engineering student and frontend developer with hands-on industry experience delivering responsive interfaces during a live hospital IT internship, complemented by open-source contribution experience within professional Git workflows. Builds end-to-end projects spanning web, embedded systems, and applied prediction models, and leads technical communities across open-source, cybersecurity, and global fellowship programs. Currently deepening backend and full-stack capabilities toward end-to-end product engineering.

PROFESSIONAL EXPERIENCE

Web Development Intern | Maharaja Agrasen Hospital

Jun 2026 – Present · Delhi, India

- Developed an internal Employee Policy Portal giving hospital staff centralized, self-service access to organizational policies through a responsive interface.
- Built and enhanced frontend components with HTML, CSS, and JavaScript to improve usability and navigation across internal systems, including the OPD card display.
- Gained hands-on exposure to Hospital Information Systems (HIS) and healthcare IT workflows, partnering with the IT team to maintain internal web applications.

Web Development Contributor | Elite Coders — Summer of Code (ECSOC 2026)

Jun 2026 – Present · Remote

- Contribute to open-source web projects within a distributed development team, following Git-based workflows and peer code review under mentor guidance.
- Apply scalable design principles to ship maintainable, production-quality code as part of a community-driven engineering initiative.

PROJECTS

Rockfall Prediction System — Smart India Hackathon (SIH) 2025

- Co-designed a predictive early-warning system to identify rockfall-prone zones for mining and hillside safety, addressing a live national government hackathon problem statement.
- Built frontend interfaces and backend logic to process risk data and surface actionable alerts, collaborating across a cross-functional team under time constraints.

Temperature Dashboard — Data Visualization

- Designed and built an interactive temperature monitoring dashboard with a distinct visual approach benchmarked against comparable public projects.

Animal Safety Alert System — Arduino / Embedded Systems

- Engineered a prototype to detect animal movement near railway tracks and trigger real-time alerts, integrating motion sensors with Arduino-based control logic.

LEADERSHIP & GLOBAL PROGRAMS

- Campus Lead & Contributor, Open Source Connect Global (OSCG) — led campus-wide open-source engagement and mentored new contributors at GTBIT (Feb–May 2026).
- Aspire Leaders Program Fellow — selected for a globally competitive leadership and professional-development program with an international cohort (Feb–Jun 2026).
- SheFi Scholar, Season 16 — fully funded Web3/blockchain leadership program backed by Base, Trezor Wallet, and Decentraland (Feb–May 2026).
- Community Ambassador, DoraDAO — drove developer outreach and open-source participation across a global Web3 ecosystem (Jan–Mar 2026).
- Cybersecurity Team Member, Geek Room GTBIT — built foundations in Linux, networking, and the OSI model; solved CTF challenges (Oct 2025–Present).
- Student Partner, Internshala — led campus outreach and digital campaigns promoting internship and upskilling opportunities (Jun–Jul 2026).
- Management Team Member, INFINITY (Mathematics Society), GTBIT — coordinated planning and execution of MatheThon 2025 (Jan–Aug 2025).

TECHNICAL SKILLS

Languages: Java (OOP), C, C++, Python, JavaScript

Frontend: HTML5, CSS3, JavaScript (ES6+), Responsive Design

Backend & Data: REST APIs, MySQL, Backend Fundamentals (in progress)

Tools & Platforms: Git, GitHub, Linux, VS Code

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Expected 2028

Guru Tegh Bahadur Institute of Technology (GGSIPU), Delhi

ACHIEVEMENTS

- Secured 2nd Position at Sanchar 3.0, a technical competition hosted at GTBIT.
- Completed workshops on Fusion IoT & Generative AI for Innovative Applications (IIC @ GTBIT) and GitHub & LinkedIn Optimization.
